Welcome to school based teletherapy!

EBS is here to support you! In response to your changing roles and responsibilities, confinement, and uncertainty, we at EBS want you to know that we are here to support you through it all. As many districts across the country move to a teletherapy model, we have developed and gathered some of the best resources to help with this transition. Here are just a few ways:

1. EBS Teletherapy weblink: https://ebstelepractice.com/
   - After you login using your EBS United email account, it should take you to a main page. When you scroll down, you'll see additional tutorials and the links for the Resource Folders

2. Short webinars including: Parent/Caregiver Guide to Being a Facilitator in Telepractice

3. Many new resources, activities, weblinks for home enrichment activities and teletherapy tools, and updates from our governing and professional organizations.
   - You can also access the discipline specific Resource Folder on the EBS Google Drive: Shared with Me - EBS Resources - <Select your discipline> - <discipline> Resources
   - The folders will be updated on a regular basis. Feel free to share with your Regional/Lead anything you find that is useful and want to share with the rest of our team.

4. 2 hour webinar entitled: Considerations for School Based OTs and PTs Conducting Teletherapy: A Response to COVID-19 is now available for your review.
   - In addition to the webinar there are a number of electronic resources with web links and intervention ideas. We have also included a short recording that includes an example of an OT and a PT teletherapy session.

5. EBS University
   - For OTs and SLPs, you’ll find a webinar entitled “OT Telepractice Certification” or “SLP Telepractice Certification” which is available if you want additional info. We recommend watching the EBS Telepractice webinar and/or Considerations for School Based OTs and PTs one first!
   - Coaching Caregivers in Early Intervention (for ALL disciplines!)
     - Patty Miller, OTR/L, discusses strategies for enhancing parent competence and confidence in Infant-Toddler Early Intervention settings. Principles of adult learning are reviewed, and the application of coaching strategies are introduced.
     - *Although originally developed for EI, the coaching model discussed in this webinar is pertinent at this time and this webinar is relevant for school based teletherapy practitioners as well.*

Important note: You can only access the training and materials using your EBS United email address. If you have not used it in a while, or never had one, please contact your career specialist and Regional/Lead immediately to get your EBS United email activated (or re-activated).
